Nakshatra Gupta

Shrey Patel

Ayr Neto

Boudhayan Chakraborty

1) Actors

1. Regular User (Student/User)

Primary end user of the application.

Capabilities:

- Create and manage worries/tasks with reminders
- Use the Routine Trainer to build daily habits
- Interact with the AI Therapist for guided coping strategies
- Log daily mood ratings (1–5) with reflections
- Search for and connect with a psychologist
- Engage in real-time chat with an assigned psychologist
- Read mental health articles and receive notifications
- Control consent settings for sharing mood logs

2. Psychologist (Provider)

A mental health professional using the platform to assist users.

Capabilities:

- View assigned clients
- Access real-time chat with users
- Review mood logs (if user consent is enabled)
- Monitor online/offline status

- View client profiles and activity summaries

3. Admin

System-level manager of the platform.

Capabilities:

- Manage users and psychologists
- Publish and moderate articles
- Send real-time notifications to users
- Monitor content quality and platform usage

2) Non-Functional Requirements

- Fast UI responses (< 1 sec for navigation)
- Reminders trigger at the correct date/time even after app restarts
- Chat must feel real-time (messages appear instantly)
- User data must be private (authentication + secure storage)
- App should handle network failure gracefully (offline messages queued / error states)

3) Tables and Fields – Calmify App

User: Tracks information related to a user's account

- User ID – Primary Key
- Full Name
- Email
- Hashed Password
- Role (Regular User / Psychologist / Admin)
- Profile Image URL
- Privacy Settings (mood log visibility, data sharing consent)
- Active – Used for soft delete of account
- Last Login Time
- Created At

MoodLog: Stores daily check-in entries

- MoodLog ID – Primary Key
- User ID – Foreign Key to User table
- Mood Rating (1–5)
- Pros (Text)
- Cons (Text)
- Timestamp

Reminder: Stores tasks/worries created by users

- Reminder ID – Primary Key
- User ID – Foreign Key to User table
- Title
- Description (Reason / Why important)
- Due Date
- Reminder DateTime
- Priority (optional)
- Status (Upcoming / Completed)
- Created At
- Updated At

Routine: Tracks user habit-building progress

- Routine ID – Primary Key
- User ID – Foreign Key to User table
- Routine Name
- Current Day Count
- Target Days (e.g., 60)
- Start Date
- Completed (Boolean)
- Last Updated

PsychologistProfile: Stores psychologist-specific data

- Psychologist ID – Primary Key
- User ID – Foreign Key to User table
- Specialization
- Years of Experience
- Session Price
- Rating
- Availability Status (Online / Offline)
- Bio
- Verified (Boolean)

UserPsychologist: Maps users to assigned psychologists

- Assignment ID – Primary Key
- User ID – Foreign Key to User table
- Psychologist ID – Foreign Key to PsychologistProfile table
- Date Assigned
- Active (Boolean for soft unlink)

- ChatSession ID – Primary Key
- User ID – Foreign Key to User table
- Psychologist ID – Foreign Key to PsychologistProfile table
- Created At
- Active (Boolean)

Message: Stores individual chat messages

- Message ID – Primary Key
- ChatSession ID – Foreign Key to ChatSession table
- Sender ID – Foreign Key to User table
- Message Content
- Timestamp
- Read Status (Boolean)

Article: Stores admin-published content

- Article ID – Primary Key
- Title
- Category (Anxiety / Sleep / Study / Motivation)
- Content
- Image URL
- Published By – Foreign Key to User table (Admin)
- Published Date
- Active (Soft delete flag)

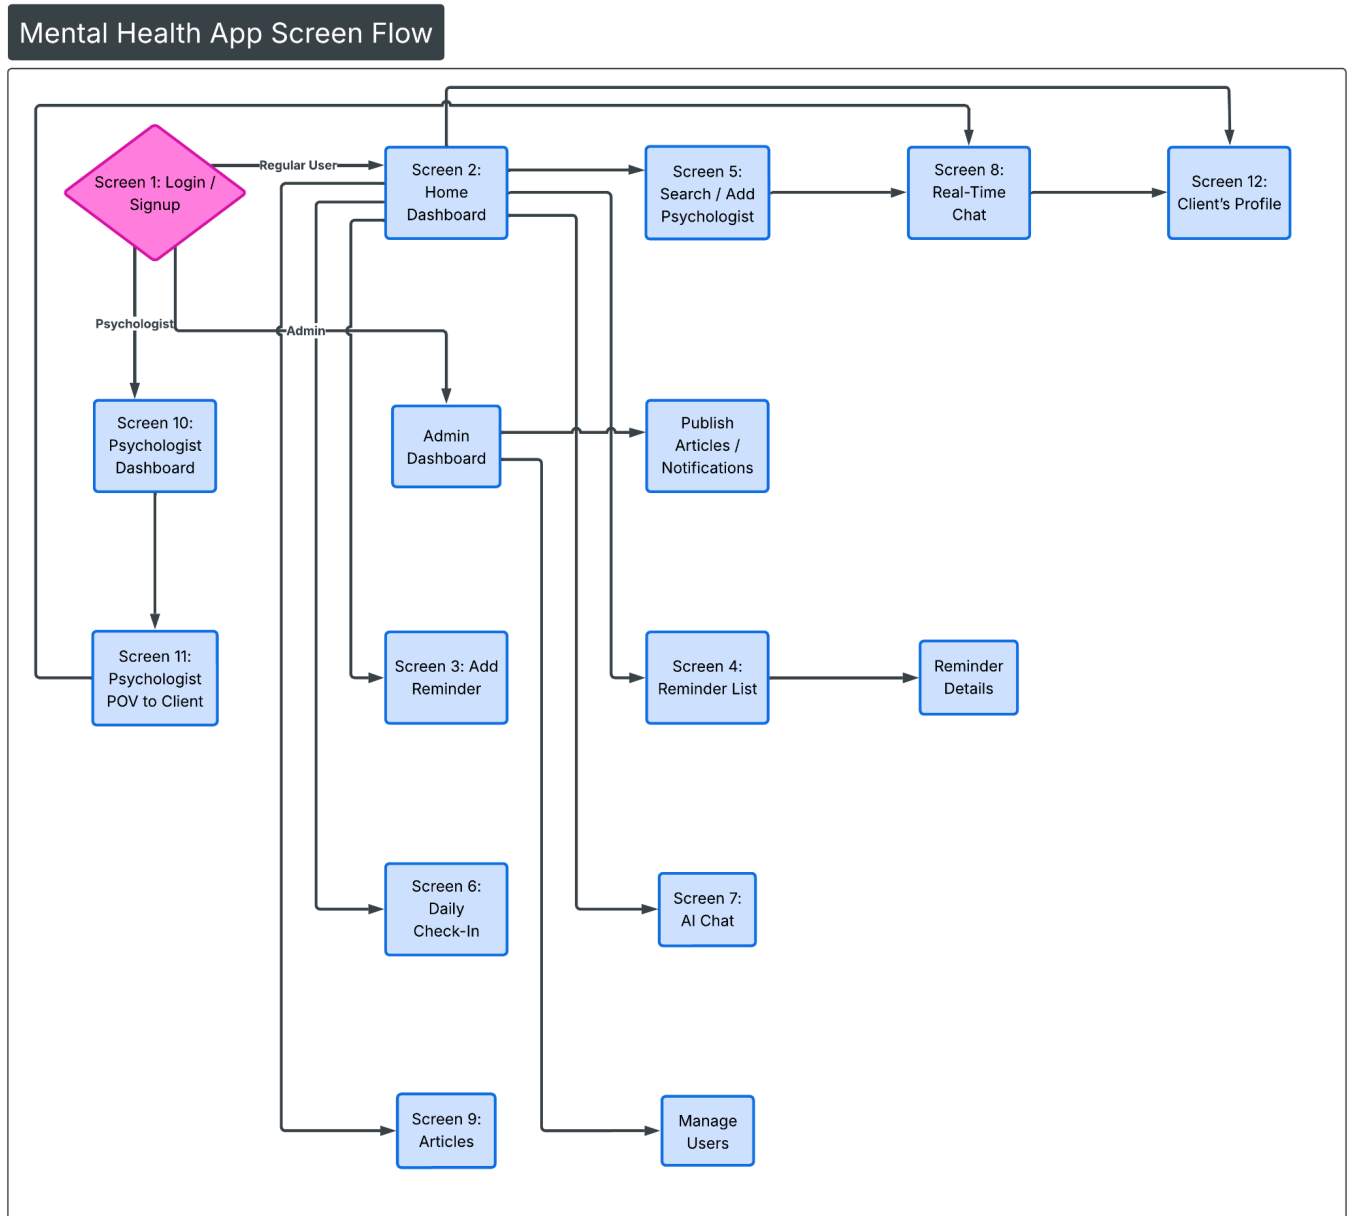

Notification: Stores user notifications

- Notification ID – Primary Key
- User ID – Foreign Key to User table
- Title
- Message
- Type (Article / Chat / System)
- Read Status
- Created At

SessionBooking: Tracks booked counselling sessions

- Booking ID – Primary Key
- User ID – Foreign Key to User table
- Psychologist ID – Foreign Key to PsychologistProfile table
- Scheduled Date & Time
- Status (Pending / Confirmed / Completed / Cancelled)
- Created At

4) Screen Flow (High-Level)

5) Screen Sketches (main screens)

Screen 1: Login / Signup - Ayr Neto

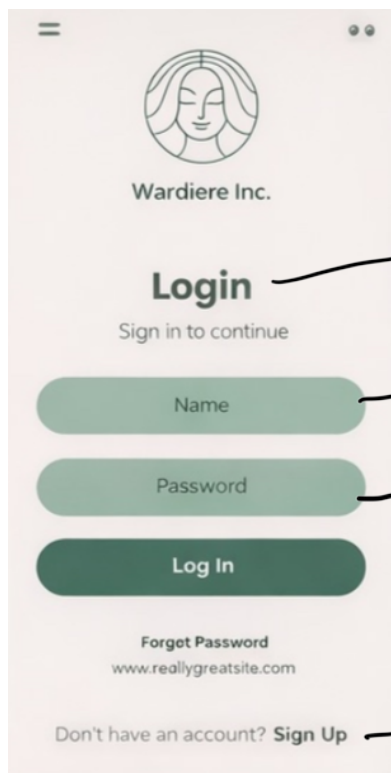

Purpose: Authenticate users based on role.

UI Elements:

1. App logo and name (centered at top)
2. Email/Username input
3. Password input
4. Role selector (User / Psychologist / Admin)
5. Login button
6. Signup option
7. Error message display area

Behavior:

- Successful login redirects to the role-specific dashboard.
- Invalid credentials display an inline error.
- Signup creates a new account and returns to the login screen.

→ Login for existing accounts

— Credentials (User / Admin / Psychologist)

→ Sign up for new accounts

Screen 2: Home Dashboard - Boudhayan Chakraborty

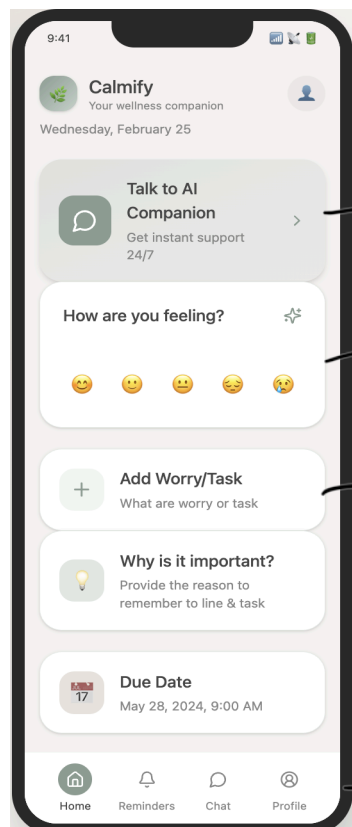

Purpose: Main navigation center for the Regular User.

UI Elements:

1. "How are you feeling?" engagement banner
2. Button: Add Worry/Task
3. Button: Routine Trainer
4. Button: Daily Check-In
5. Button: AI Therapist Chat
6. Button: Psychologist Chat
7. Button: Articles
8. Bottom Navigation: Home / Reminders / Chat / Profile

Behavior:

- Provides quick access to core features.
- Displays notification indicators for new messages or articles.

→ Button to access AI

→ Checking user's mood

→ Option to create worries and tasks

→ Easy Navigation Bar

Screen 3: Task and Worry Manager (Notes) - Ayr Neto

Purpose: Create structured reminders for tasks or worries.

UI Elements:

1. Title: "Add Reminder"
2. Input: "What's on your mind?"
3. Input: "Why is it important?"
4. Due date selector
5. Reminder date/time selector
6. Optional priority selector
7. Save button
8. Cancel/back button

Behavior:

- Saves the schedule reminder and stores it in the database.
- Reminder time must be valid and in the future.
- Cancel returns to the Reminder List.

The screenshot shows the 'Task & Worry Manager' app interface. The title is 'Task & Worry Manager' with the subtitle 'Keep track of what needs your attention'. The form has four main sections: 1. 'What do you need to do or worry about?' with a text input field. 2. 'Why do you need to worry about it?' with category buttons: School, Work, Mind, Health, Personal, and Finance. 3. 'When is it due?' with a date picker. 4. 'Reminder' section with a date picker and a time picker. At the bottom is an 'Add Task' button. Handwritten annotations in black ink point to these sections: an arrow from the text input to 'Text box to add a description to the task user creates', an arrow from the category buttons to 'Category of task', an arrow from the date picker to 'Adding a due date', and a bracket from both the date and time pickers to 'Reminder / Alert date'.

Screen 4: Reminder List - Shrey Patel

Purpose: View and manage reminders.

UI Elements:

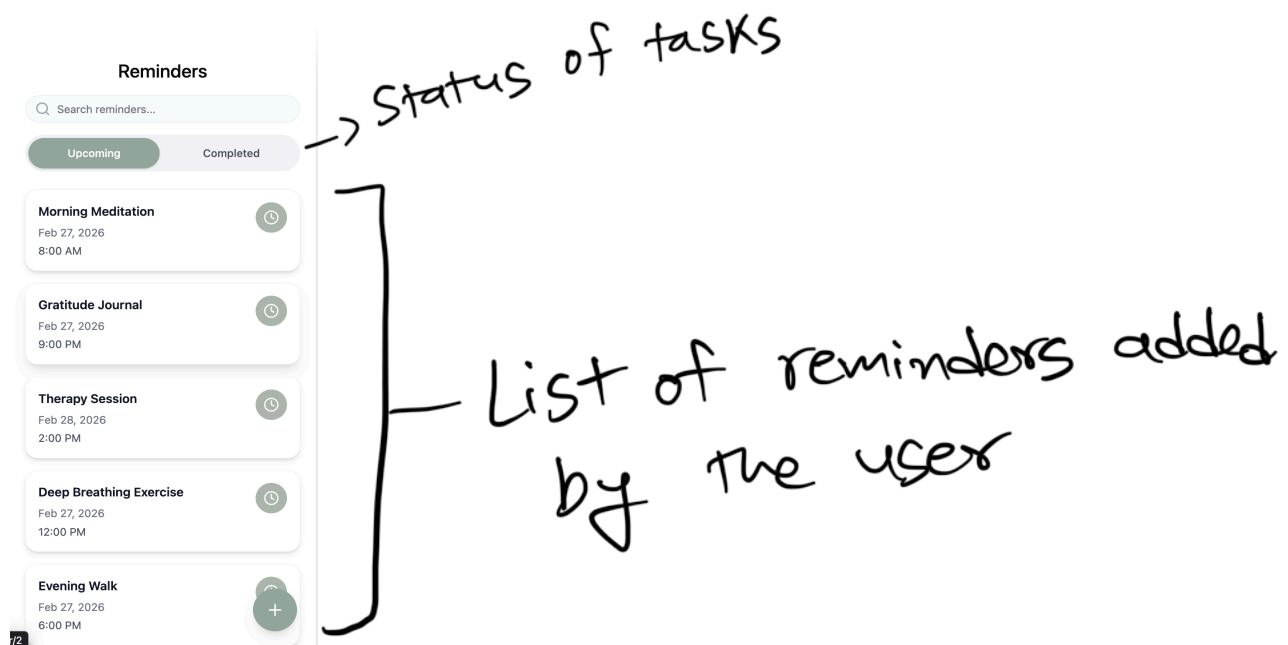

1. Search bar
2. Tabs: Upcoming / Completed
3. Reminder cards (Title, Date, Time)
4. Floating “+” Add button
5. Swipe to complete/delete

Reminder Details View:

- Full description
- Reason/importance
- Due date and time
- Buttons: Edit / Delete / Mark Complete

Behavior:

- Updates dynamically when reminders are added or completed.
- Uses soft card layout for clarity.

Screen 5: Adding or Searching a Psychologist - Shrey Patel

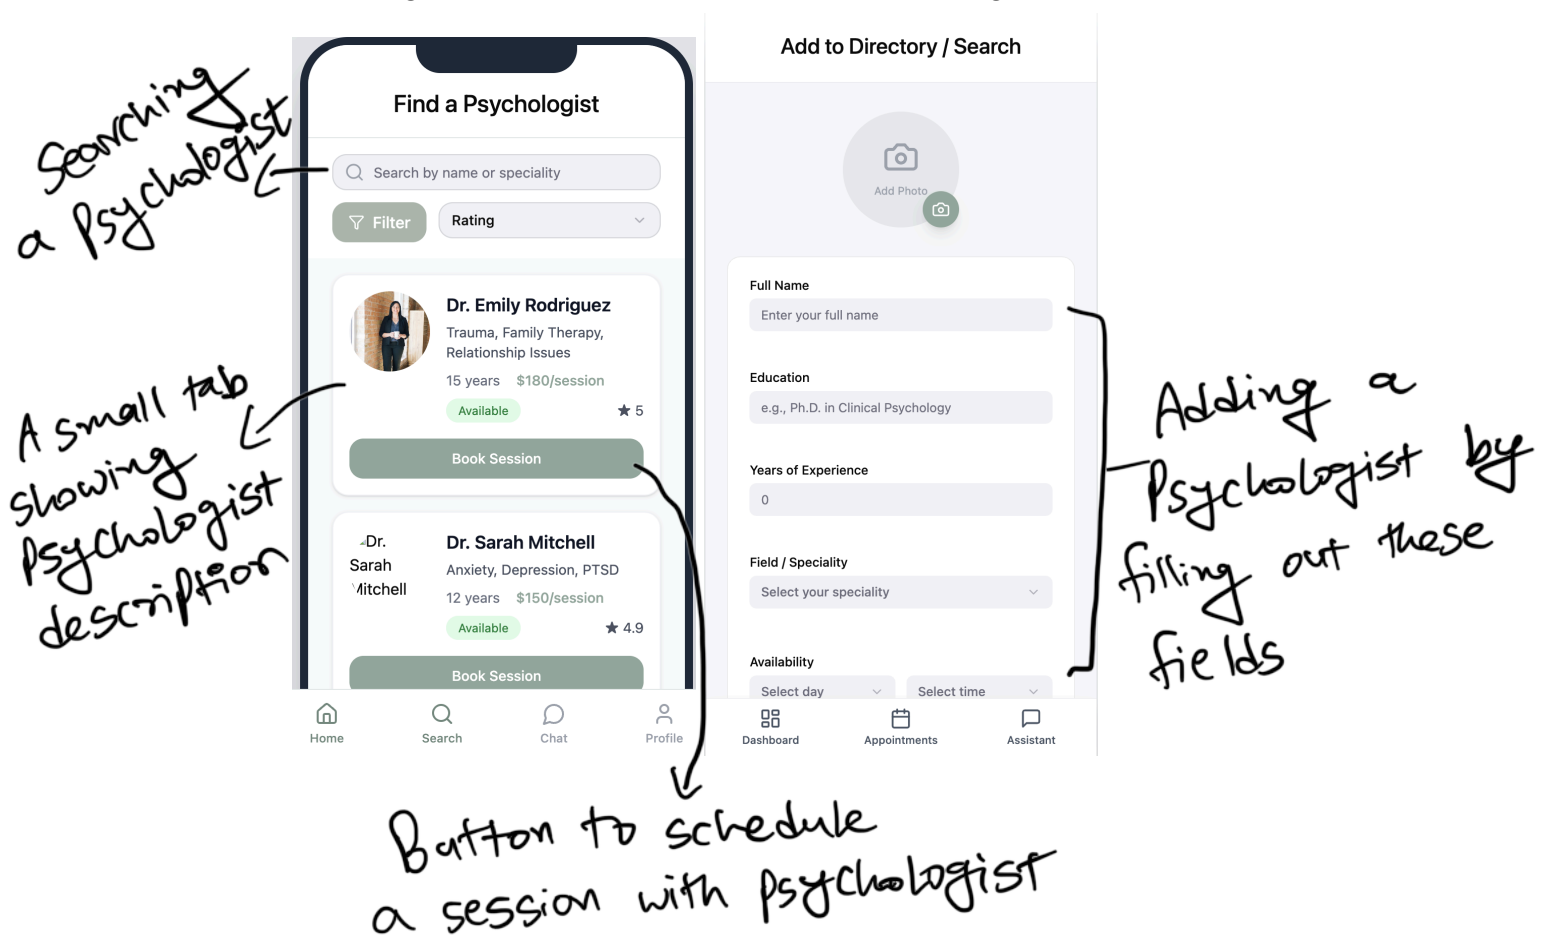

Purpose: Allow users to browse and connect with psychologists.

UI Elements (aligned with image):

1. Search bar (by name or specialty)
2. Filter and rating dropdown
3. Psychologist cards:
 - Name
 - Profile image
 - Specialty
 - Years of experience
 - Price per session
 - Availability indicator
 - “Book Session” button
4. Add to Directory / Search panel (for admin or profile setup)

Behavior:

- Users can search and filter psychologists.
- Selecting “Book Session” initiates chat or booking flow.

Screen 6: Daily Check-In (End of Day) - Ayr Neto

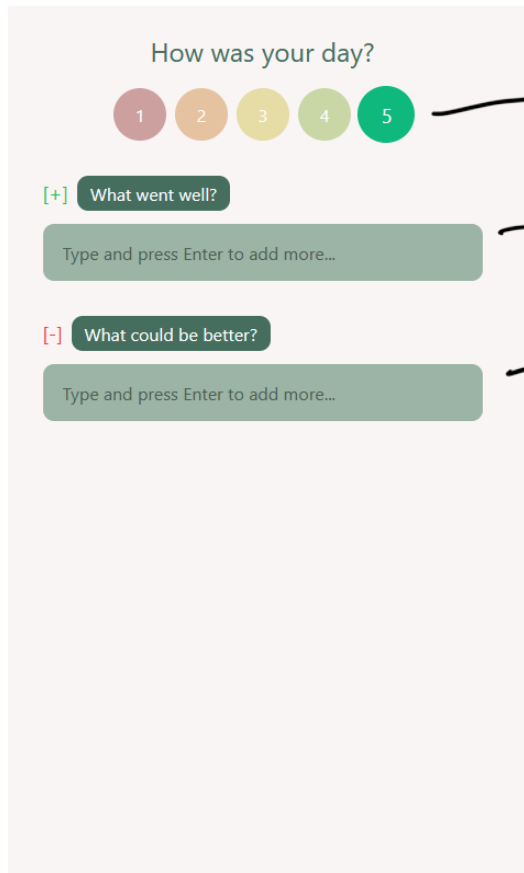

Purpose: Daily emotional reflection and mood tracking.

UI Elements:

1. “How was your day?” rating scale (1–5, color-coded)
2. Text box: What went well?
3. Text box: What could be better?
4. Save button
5. Skip option

Behavior:

- Saves the mood log to the database.
- Mood logs visible to the psychologist (optional)
- Encourages reflection without pressure.

The image shows a mobile app interface for a daily check-in. At the top, the text "How was your day?" is displayed above a horizontal row of five colored circles numbered 1 to 5. Below this, there are two text input sections. The first section is titled "[+] What went well?" and contains a text box with the placeholder "Type and press Enter to add more...". The second section is titled "[-] What could be better?" and also contains a text box with the placeholder "Type and press Enter to add more...".

→ Rating meter/scale

} Feedback of the day

Screen 7: AI Therapist Chat - Boudhayan Chakraborty

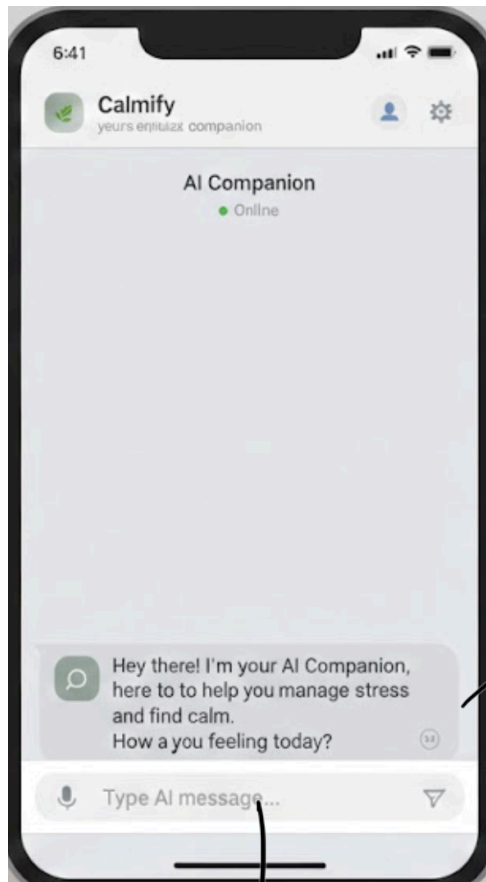

Purpose: Provide AI-driven conversational support.

UI Elements:

1. Chat message window
2. AI companion header with online status
3. Text input field
4. Send button
5. Quick suggestion prompts
6. Disclaimer text

Behavior:

- User message triggers an AI response.
- AI may recommend coping strategies.
- Designed to feel supportive and non-clinical.

AI Companion
for support

Message Field

Screen 8: Psychologist Real-Time Chat - Shrey Patel

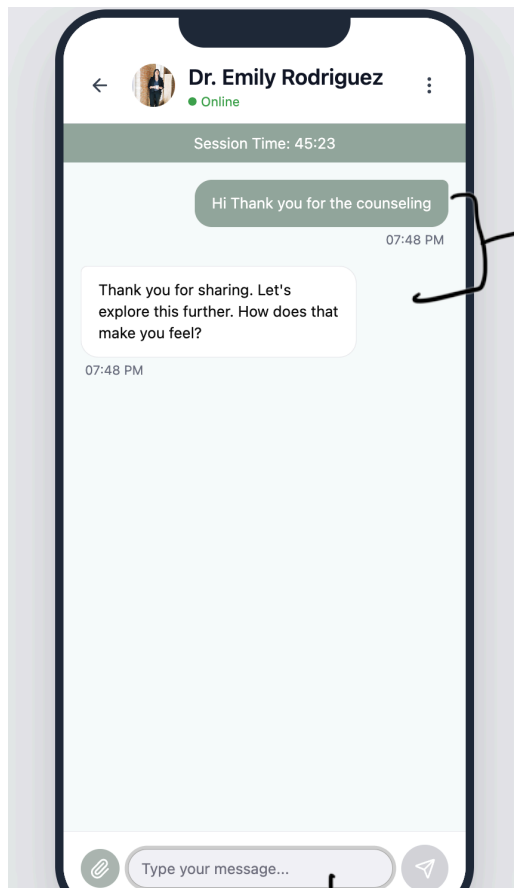

Purpose: Real-time communication between the user and the psychologist.

UI Elements:

1. Psychologist profile header with status
2. Chat window
3. Text input + send
4. Optional appointment request
5. Consent toggle for mood logs

Behavior:

- Messages delivered instantly using WebSockets.
- If offline, messages are queued, or the user is notified.
- Secure, encrypted communication.

Real-time chat between the user and psychologist

Message field

Screen 9: Articles & Notifications Feed - Nakshatra Gupta

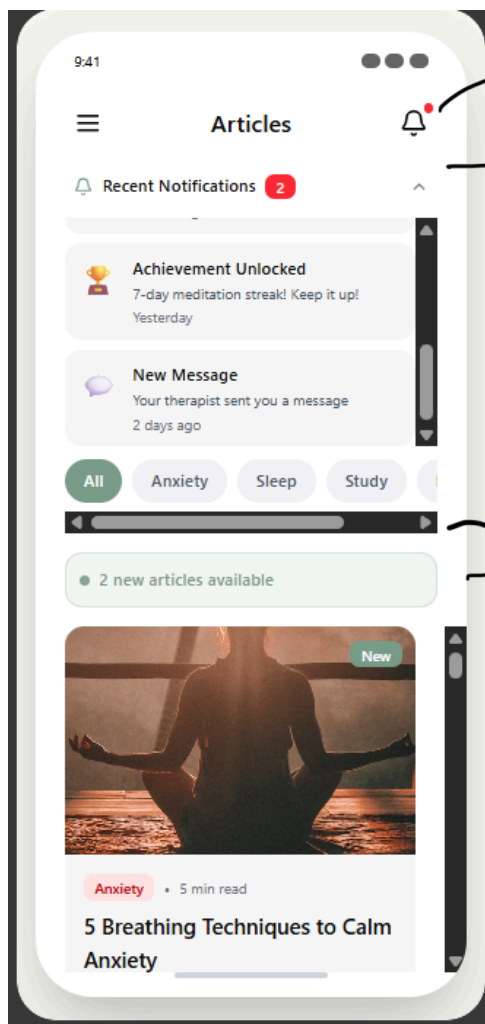

Purpose: Provide curated mental health resources.

UI Elements:

1. Article cards with image, category tag, title, and read time
2. Category filters (Anxiety / Sleep / Study / Motivation)
3. Notification badge for new articles
4. Recent notifications section

Behavior:

- Admin publishes article → real-time push notification.
- Users open and read articles within the app.

Bell Icon for accessing notifications

Notification Section (Updates in real-time)

Displays the articles published by the admin

Screen 10: Psychologist Dashboard - Nakshatra Gupta

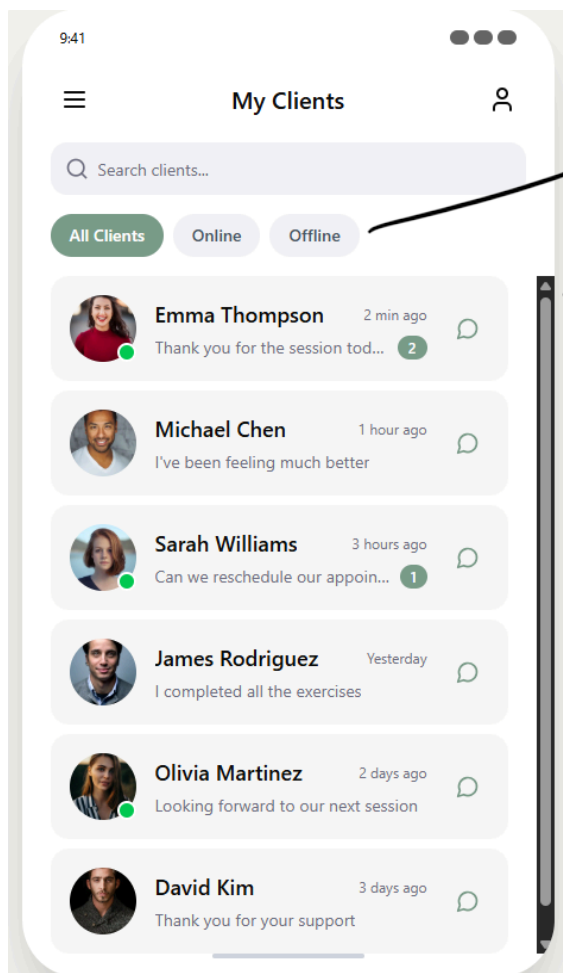

Purpose: Manage assigned clients.

UI Elements:

1. Client list
2. Search bar
3. Filter (All / Online / Offline)
4. Status indicators
5. Message preview snippets

Behavior:

- Selecting a client opens the client profile or chat.

Filter to search clients

List of clients and chat history for the psychologist

Screen 11: Psychologist's POV to Client Profile - Nakshatra Gupta

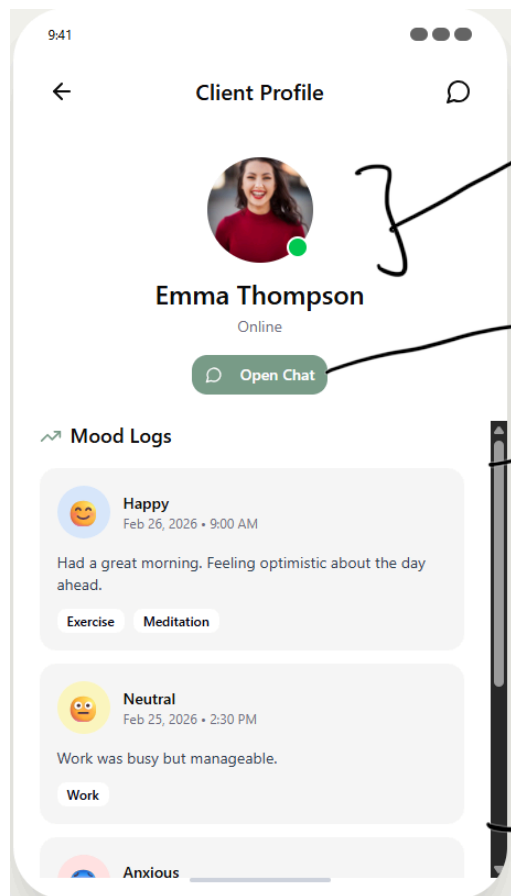

Purpose: View client details and mood logs.

UI Elements:

1. Client name and profile image
2. Online indicator
3. "Open Chat" button
4. Mood logs timeline
5. Activity summary

Behavior:

- Psychologist reviews logs (optional).
- Direct chat initiation available.

Screen 12: Client's Profile - Boudhayan Chakraborty

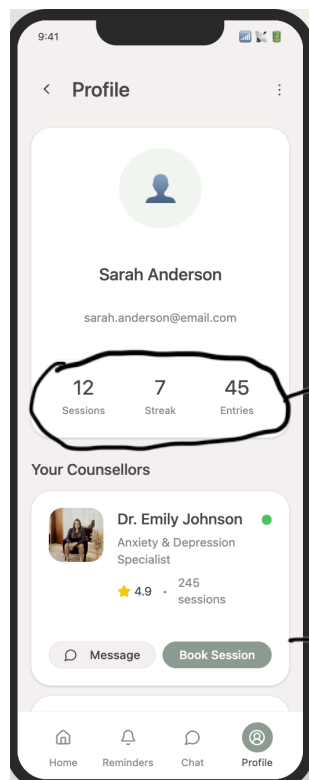

Purpose: Allow the user to view personal information, activity statistics, and connected counsellors.

UI Elements:

1. Profile picture
2. Name and email
3. Sessions / Streak / Entries statistics
4. Counsellor card (name, specialization, rating, status)
5. Message button
6. Book Session button
7. Bottom navigation bar

Behavior:

- Profile data loads from the user account.
- Statistics update automatically.
- Book Session starts scheduling flow.

User statistics showing sessions, streaks and entries the user has made.

Displays the current psychologist the user is assigned / talking to.
